

VERTEX

ENERGY & INDUSTRIAL SOLUTIONS

Technical Procurement | Industrial Supply | Field Support

A field-informed business platform connecting technical requirements with reliable sourcing, specialist coordination and accountable delivery.

COMPANY PROFILE 2026

PAKISTAN

Practical support for demanding operations

Vertex Energy & Industrial Solutions (Pvt.) Ltd. supports energy, industrial and commercial organizations with technical procurement, industrial supply, field-support coordination and selected facility and technology solutions.

Our approach begins with understanding the requirement - operating environment, specification, quantities, delivery location, documentation, acceptance criteria and timeline - before defining the sourcing or service solution.

1

OIL & GAS SUPPORT

Field and operational coordination for defined oilfield requirements.

2

TECHNICAL PROCUREMENT

Specification-led sourcing of industrial and oilfield products.

3

INDUSTRIAL SUPPLY

Mechanical, electrical, MRO, safety and site requirements.

4

SPECIALIST COORDINATION

Third-party equipment, rental, inspection and technical services.

5

FACILITIES & TECHNOLOGY

CCTV, networking, IT, HVAC and defined maintenance solutions.

Field understanding behind the commercial process

Industrial procurement is not simply about finding a product. The wrong material, connection, rating, specification or documentation can cause rejection, delay, additional cost or operational disruption.

01

DELIVERY

05

READINESS

The professional foundation behind Vertex includes oil and gas experience beginning in 2014 across data acquisition engineering, well-site coordination, hydraulic fracturing interfaces, intervention activities, wireline, equipment readiness, site moves, operational reporting and HSE coordination.

CLEAR REQUIREMENTS

Define what is needed before sourcing or mobilization.

TRANSPARENT OFFERS

Clarify scope, lead times, responsibilities and exclusions.

ACCOUNTABLE DELIVERY

Coordinate suppliers, site needs and handover around the accepted scope.

Oil & gas support

Supporting field requirements from enquiry to execution.

OPERATIONS COORDINATION

Well-site interfaces, activity tracking, equipment-readiness follow-up, daily reporting, site moves and coordination between intervention, wireline, pumping and logistics teams.

TECHNICAL SOURCING

Valves, fittings, industrial hoses, adapters, seals, tools, pressure-control accessories and related consumables matched to service conditions and documentation needs.

SPECIALIST INTERFACES

Coordination of suitable third-party rental, inspection, maintenance and specialist providers where required.

SCOPE CONTROL

Safety-critical execution remains subject to technical review, competent personnel, approved procedures and client requirements.

VERTEX ROLE

Clarify the requirement. Coordinate the right parties. Maintain visibility from enquiry through handover.

Technical procurement & industrial supply

MECHANICAL & MRO

Valves | Pipe fittings |
Fasteners | Gaskets | Seals
| Hoses | Bearings |
Workshop tools |
Maintenance consumables

ELECTRICAL & SITE

Cables | Cable
management | Lighting |
Electrical components | PPE
| Site consumables

EQUIPMENT

Pumps | Generators |
Compressors | Lifting
equipment | Construction
equipment | Transport

PROCUREMENT ASSURANCE

Where applicable, quotations identify manufacturer/brand, model or part number, quantity, specification, country of origin, availability, lead time, warranty and required documentation. Alternatives are disclosed for client review and approval.

THE COMMERCIAL DIFFERENCE

Vertex is positioned around specification-led procurement - not simply a catalogue of products.

Equipment & specialist coordination

Asset-light coordination of appropriate third-party equipment and specialist capability.

EQUIPMENT ENQUIRIES

- Pumps
- Generators
- Compressors
- Lifting equipment
- Construction equipment
- Transport requirements
- Industrial equipment

OFFER CONTROLS

- 01 Availability
- 02 Certification
- 03 Operator provision
- 04 Mobilization
- 05 Execution responsibility
- 06 Commercial responsibility

Technical execution is assigned only to parties appropriate to the scope and client requirements. Vertex coordinates the commercial and operational interface without overstating ownership or specialist capability.

Facilities & technology solutions

Supporting the infrastructure behind industrial, commercial and institutional operations.

CCTV & SECURITY

Site surveys, coverage planning, IP cameras, NVR/storage, access control, attendance systems, readers, controllers and gate interfaces.

NETWORKING & CONNECTIVITY

Structured cabling, switches, routers, wireless access points, point-to-point connectivity and network accessories.

IT SUPPORT

Workstations, printers, network accessories, setup, troubleshooting, maintenance, asset documentation and configuration records.

HVAC & FACILITIES

AC assessment, installation coordination, preventive maintenance, servicing, ductwork, minor M&E maintenance and breakdown support.

Industries we serve

01

OIL & GAS

Operators, service companies and contractors.

02

INDUSTRIAL & MANUFACTURING

Factories, production facilities and maintenance teams.

03

EPC & ENGINEERING

Technical sourcing, equipment coordination and supply packages.

04

WORKSHOPS & MAINTENANCE

Tools, components, consumables and equipment requirements.

05

COMMERCIAL & WAREHOUSING

Facilities, technology and maintenance requirements.

06

EDUCATION & INSTITUTIONS

CCTV, networking, IT, HVAC and electrical requirements.

07

GOVERNMENT & PUBLIC SECTOR

Eligible supply and service opportunities subject to applicable procurement requirements.

From requirement to handover

01

UNDERSTAND

Review enquiry, location, quantities, drawings and service conditions.

02

DEFINE

Set specification, scope boundary, schedule, terms, documentation and exclusions.

03

SOURCE & COORDINATE

Confirm availability, approvals, suppliers, site access, personnel, tools and safety requirements.

04

DELIVER & VERIFY

Check items or work against accepted scope and resolve discrepancies.

05

CLOSE OUT

Submit agreed delivery notes, service records, warranty and handover information.

HSE, quality & procurement discipline

HEALTH, SAFETY & ENVIRONMENT

Review activity risks, verify competence, follow client site rules, use appropriate PPE, maintain housekeeping and stop work where uncontrolled hazards exist.

QUALITY & TRACEABILITY

Use approved specifications and identifiable products. Request certificates, inspection reports or calibration records where the scope requires them.

RESPONSIBLE DELIVERY

Plan waste handling, material storage and resource use. Protect client information and system credentials on a need-to-know basis.

PROJECT DOCUMENTATION

Method statements, risk assessments, inspection plans and handover records can be prepared as required by the agreed scope.

These are operating principles and project-specific commitments; they are not presented as independent ISO certification unless such certification is formally obtained.

Professional foundation

BABAR ALI MALIK

Oil & Gas Operational Experience | Since 2014

Professional background in data acquisition engineering and well-site coordination across conventional and unconventional oil and gas activities, including assignments involving Halliburton, Weatherford, SLB and NESR through employment or manpower arrangements.

RELEVANT EXPOSURE

- Hydraulic fracturing coordination
- Pre- and post-intervention activities
- Wireline interfaces
- Site moves & equipment readiness
- Daily operational reporting
- HSE coordination
- Saudi unconventional operations
- Multi-service field environments

EXPERIENCE ATTRIBUTION

Organizations and activities referenced above relate to individual professional experience and are not represented as Vertex clients, contracts, endorsements or completed company projects.

SEND US YOUR REQUIREMENT

For technical procurement, industrial supply, equipment or service enquiries, send the requirement with as much technical detail as available.
